

| | | | | |
|-----|---|--|---|---------------|
| 1. | Course title | Formal languages and automata | | |
| 2. | Course code | CSEW317 | | |
| 3. | Study program | KNI, IKI, ASI | | |
| 4. | Unit offering the course | FCSE | | |
| 5. | Undergraduate/postgraduate/PhD | Undergraduate | | |
| 6. | Year/semester 2/ winter | 7. ECTS: 6 | | |
| 8. | Teacher(s) | Academic prof. dr. Ljupco Kocarev, prof. dr. Marija Mihova, assoc. prof. dr. Igor Trajkovski, assoc. prof. dr. Boro Jakimovski | | |
| 9. | Course prerequisites | none | | |
| 10. | Goals (competences): Being competent to use formal models of computability as a basis for the theory and practice of program languages and compilers. To be competent to follow a higher course of theory of computation. Introduction to languages, regular and context-free languages, finite automata and push down automata, grammars and relationship between certain types of automata and languages. | | | |
| 11. | Course content: Introduction to formal languages and automata. Finite automata. Regular expressions and regular languages. Properties of regular languages. Context free grammars and languages. Push-down automata. Properties of context free languages. Turing machines. Undecidability. P, NP and other classes of problems; | | | |
| 12. | Teaching methods: Lectures, theoretical exercises, laboratory exercises, project work, homework. | | | |
| 13. | Total available time | 6 ECTS x 30 hours = 180 hours | | |
| 14. | Distribution of the available time | 30 + 45 + 30 + 35 + 40 = 180 hours | | |
| 15. | Teaching activities | 15.1. | Lectures | 30 hours |
| | | 15.2. | Training (labs, problem solving), seminar and team work | 45 hours |
| 16. | Other activities | 16.1. | Project work | 30 hours |
| | | 16.2. | Self study | 35 hours |
| | | 16.3. | Home work | 40 hours |
| 17. | Grading | | | |
| | 17.1 | Tests | | 80 points |
| | 17.2 | Seminar work/project (written or oral presentation) | | 20 points |
| | 17.3 | Active participation | | 0 points |
| 18. | Grading criteria | to 50 points | | 5 (five) (F) |
| | | from 51 to 60 points | | 6 (six) (E) |
| | | from 61 to 70 points | | 7 (seven) (D) |

| | | | | | | |
|-----|---------------------------|--|--|---|----------------|------|
| | | from 71 to 80 points | 8 (eight) (C) | | | |
| | | from 81 to 90 points | 9 (nine) (B) | | | |
| | | from 91 to 100 points | 10 (ten) (A) | | | |
| 19 | Final exam prerequisites | Completed activities 15 and 16 | | | | |
| 20 | Course language | Macedonian and English | | | | |
| 21 | Quality assurance methods | Internal evaluation and satisfaction polls | | | | |
| 22 | Literature | | | | | |
| | 22.1. | Compulsory | | | | |
| | | No. | Authors | Title | Publisher | Year |
| | | 1. | John E. Hopcroft, Rajeev Motwani, Jeffrey D. Ullman | Introduction to Automata Theory, Languages, and Computation | Addison-Wesley | 2006 |
| | | 2. | Б. Јанева | Алгоритми и автомати | ПМФ, Скопје | 1999 |
| | 3. | Elaine Rich | Automata, Computability and Complexity Theory and applications | Pearson Education, Inc . | 2008 | |
| | 22.2. | Mandatory | | | | |
| No. | | Authors | Title | Publisher | Year | |
| | 1. | Michael Sipser | Introduction on the theory of computation | PWS Pub. Co. | 1996 | |
