

Final project proposal

Type	Master
Title	<i>Modeling the Performance of Secured Cloud Application and Data</i>
Supervisor	Sashko Ristov
e-mail	sashko.ristov@finki.ukim.mk
Department / Group	
LIIT (Laboratory for Internet and Innovative Technologies)	
Topic(s)	
Cloud Computing, Security, Performance	
Project can start from	01.04.2014
Project duration	4 months
Short description	
After implementing several modern end-to-end security techniques in cloud applications, the student should model their performance on client's and cloud service provider's parameters by using different hypervisors, clouds, and resources.	
Results and assessment	
The student should present a model, which will minimize the cost of the clients and cloud service providers.
